Copy 5 of 6

Requirement RR/MEA/S21-58

1. Re-examination of photography, [] of a facility located a short distance west of Tiksi Airfield reveals no evidence that it is related to guided missile activity.

2. A possible quarry, type undetermined, is located along the top of a low hill. A possible conveyor leads from near the quarry to a structure near the bottom of the hill. This structure, located adjacent to the road that joins Tiksi Airfield to the town of Tiksi, is possibly a loading facility for the possible quarry operation. Sandstone, limestone, sand and gravel quarries are reported near Tiksi. A building area, located nearby and to the northwest of the possible loading facility, is the probable support area for Tiksi Airfield.
